Get to Know Ossid and its High-Speed Tray Sealing and Packaging Machines in Booth C-3214 at PACK EXPO 2019

BATTLEBORO, N.C., September 18, 2019 – When you're ready to package or wrap meat, poultry, vegetables and other food products, then you need to see **Ossid** and its lineup of tray packaging and stretch wrapping machines in action in booth No. C-3214 at PACK EXPO 2019, September 23-25, in Las Vegas.

Ossid is the industry's premier brand in manufacturing sustainable, efficient tray packaging, weigh/labeling and form fill seal machinery for numerous industries, including food, healthcare and others. Ossid will be demonstrating the packaging capabilities of three machines at PACK EXPO 2019.

500Si High-Speed Stretch Wrapper

Ossid's 500Si High-Speed Stretch Wrapper produces tightly wrapped, PVC case ready packaging at speeds of up to 120 trays per minute for the poultry, meat and produce industries. The intuitive HMI of the 500Si means operators encompassing a wide diversity of skill levels can easily use the machine.

The 500Si helps companies meet their sustainability goals by using less film than competitive overwrapping machines; no air or water utilities are required during operation. Additionally, the 500Si comes with a relatively small footprint, making it the ideal stretch wrapper for space-constrained environments. Features and benefits of the 500Si high-speed stretch wrapper include:

- Product changeover in less than two minutes
- Runs tray sizes #2 to 8" by 15" standard
- PVC stretch film capable
- Stainless steel construction
- Gripper-chain system stretches shrink films to produce tightly wrapped packages
- Servo driven technology and microprocessors reduce downtime and maintenance

ReeTray 30 Semi-Automatic Tray Sealer

The ReeTray 30 Semi-Automatic Tray Sealer is ideal for processors both large and small as it can do three types of sealing: ambient tray sealing; modified atmosphere packaging (MAP); and vacuum skin packaging (VSP).

The ReeTray 30 Semi-Automatic Tray Sealer features a two-chamber system for packaging products in standard #3 trays. Easy-to-use interface allows operators to select the type of sealing; switching to a different sealing or temperature option takes just a few seconds.

Features and benefits of the ReeTray 30 Semi-Automatic Tray Sealer include:

- Automatic film advance produces up to 24 packs per minute (depending on the size of the trays and number of trays per cycle)
- Rugged stainless-steel construction
- Manual or semi-automatic drawer feed and interchangeable tooling for fast changeovers between tray sizes

ReeForm E40 Thermoformer

The ReeForm E40 Thermoformer is designed for both large and small production output and features an all stainless-steel design for easy sanitation in washdown environments. The ReeForm E40 comes with a user-friendly control panel touch screen for easy setting and recording of different programs, and a control box for fast, efficient positioning and adjusting of bottom film.

The ReeForm E40 offers maximum packaging reliability, and consistent pack quality at a higher level of speed to process flexible and rigid film with thickness up to 600 microns and film width up to 420 mm. It provides a maximum forming depth of up to 120 mm and a maximum cut-off length of up to 300 mm.

Ossid is the U.S. master distributor of REEPACK, an Italian manufacturer of the ReeTray 30 and ReeForm 40, along with other high-quality packaging machines. To see how these three machines can streamline your packaging line to operate more efficiently and ecologically, visit Ossid in booth No. C-3214 at PACK EXPO 2019.

About Ossid

From leak-resistant proof tray sealing for case-ready proteins to flexible packaging for healthcare, Ossid packaging solutions are ideal for fresh and processed meats, convenience foods, consumer goods, and medical devices. Ossid manufactures industry-leading tray overwrappers and sealers, weigh/price-labeling equipment, case scales, and horizontal thermoform fill seal machinery for companies of all sizes. As part of the ProMach Flexibles business line, Ossid helps our packaging customers protect and grow the reputation and trust of their consumers. ProMach is performance, and the proof is in every package. Learn more about Ossid at www.Ossid.com and more about ProMach at ProMachBuilt.com.

About ProMach

ProMach is a family of best-in-class packaging solution brands serving manufacturers of all sizes and geographies in the food, beverage, pharmaceutical, personal care, and household and industrial goods industries. ProMach brands operate across the entire packaging spectrum: filling and capping, flexibles, pharma, product handling, labeling and coding, and end of line. ProMach also provides Performance Services, including integrated solutions, design/build, engineering services, and productivity software to optimize packaging line design and deliver maximum uptime.

ProMach designs, manufactures, integrates, and supports the most sophisticated and advanced packaging solutions in the global marketplace. Its diverse customer base, from Fortune 500 companies to smaller, privately held businesses worldwide, depends on reliable, flexible, technologically advanced equipment and integrated solutions. ProMach is headquartered near Cincinnati, Ohio, with manufacturing facilities and offices throughout the United States, Canada, Mexico, Brazil, Europe, United Arab Emirates, and China. For more information about ProMach, visit www.ProMachBuilt.com.
