## Next Generation Tekkra 200-Series Bundler Becomes More Modular and Flexible

*Manufacturing build time is six-weeks faster than last generation solutions.*

**WASHINGTON, Mo., September 17, 2019** – [Texwrap](#), a product brand of [ProMach](#), introduces its next generation [Tekkra 200](#)-series sideload bundler at Pack Expo, September 23-25 at the Las Vegas Convention Center. The bundler's new modular design offers dairy companies, copackers, and other customers the opportunity to customize their machine for maximum productivity based on the layout of their plant. Customers can receive their custom unit in 12 to 14 weeks rather than the previous 18 to 20 weeks, a six-week reduction in manufacturing build time. **Texwrap Pack Expo Booth #3029**

The new Tekkra 200-series bundler is rated at 15 to 20 multi-packs per minute of either supported or unsupported products – everything from ice cream cartons and tubs to sanitary wipes. Featuring toolless changeover, a recipe driven HMI, and a servo driven main ram, the Tekkra 200 enables fast changeover for maximum flexibility in bundling a range of SKUs. Tekkra 200's servo driven seal assembly ensures fast and repeatable seals. The rugged stainless-steel or powder-coated mild-steel frame is designed for years of reliable operation.

To ensure that the bundler leverages the plant's layout, Texwrap offers a choice of infeed conveyor widths, right or left side infeed orientation, discharge options of straight, right, or left, and a selection of tunnel lengths. The unit on display at Pack Expo, for example, features a 30-inch infeed and a 70-inch heat tunnel. Other custom options include product specific collation systems such as lane dividers, stackers, feed screws, pick and place systems, bundle stackers, and film splicing stations.

Texwrap warrants the 200-series for three years. For more information, call 1-800-886-7421 or visit [www.Texwrap.com](http://www.Texwrap.com).

### About Texwrap

Known as the industry innovator, Texwrap holds patents on some of the most significant breakthrough technologies in the shrink wrapping and bundling business. Texwrap produces automatic shrink wrapping systems, L-bar sealers, side sealers, tunnels, infeed solutions, and conveyor systems for the food, bakery, industrial, mailing, pharmaceutical, nutraceutical, retail, printing, and publishing industries. Texwrap also manufactures the Tekkra line of shrink bundling systems. As part of the ProMach End of Line business line, Texwrap helps

our packaging customers protect and grow the reputation and trust of their consumers. ProMach is performance, and the proof is in every package. Learn more about Texwrap at [www.Texwrap.com](http://www.Texwrap.com).

### **About ProMach**

ProMach is a family of best-in-class packaging solution brands serving manufacturers of all sizes and geographies in the food, beverage, pharmaceutical, personal care, and household and industrial goods industries. ProMach brands operate across the entire packaging spectrum: filling and capping, flexibles, pharma, product handling, labeling and coding, and end of line. ProMach also provides Performance Services, including integrated solutions, design/build, engineering services, and productivity software to optimize packaging line design and deliver maximum uptime.

ProMach designs, manufactures, integrates, and supports the most sophisticated and advanced packaging solutions in the global marketplace. Its diverse customer base, from Fortune 500 companies to smaller, privately held businesses worldwide, depends on reliable, flexible, technologically advanced equipment and integrated solutions. ProMach is headquartered near Cincinnati, Ohio, with manufacturing facilities and offices throughout the United States, Canada, Mexico, Brazil, Europe, United Arab Emirates, and China. For more information about ProMach, visit [www.ProMachBuilt.com](http://www.ProMachBuilt.com).
