Wexxar Bel Integrates TF200 Tray Former and BEL 270 Case Sealer for a Fully Automatic, Intuitive Solution for All Skill Levels

See the integration live in booth C-2824 at PACK EXPO 2019 in Las Vegas

RICHMOND, British Columbia, September 19, 2019 – The integration of the IPAK TF200 and BEL 270 increases automation levels for food-packaging operation. See it in action in booth C-2824 at PACK EXPO 2019, Sept. 23-25 at the Las Vegas Convention Center.

Part of the ProMach family of product brands, Wexxar Bel's **IPAK TF200 Fully Automatic Tray Former** provides tray-forming solutions for baking and food processing industries. Through the use of Wexxar Bel's mandrel and compression configurations, the TF200 forms a wide range of tray styles and sizes, including complex designs with telescoping lids, triangulated corners or retail ready display features.

Joining the TF200 at PACK EXPO is the compact **BEL 270 Fully Automatic Hot Melt Case Sealer**. The BEL 270 is the most compact hot melt case sealer available, with an open frame and patented Snap Folder technology which safely folds case flaps while eliminating excessive guarding to allow for better access to the machine during operation and troubleshooting. Further, the Uni-Drive System powers both side belts with a single motor to keep belts in sync, consistently providing a square seal even after prolonged use.

One of the main features of this integrated system is the extremely fast and easy changeover with color-coded instructions on the sides of both machines. Furthermore, the TF200 has been equipped with a detached secondary 7" HMI for easy access to machine controls from anywhere on the machine.

"When people changeover from one set up to another, they want to accomplish that with no tools. Changeover that's easy and not cumbersome for employees of all skill levels to perform is something that Wexxar Bel does extremely well," said Mike "Parky" Parkinson, IPAK Product Manager.

PACK EXPO attendees will see how both machines work together to form and seal corrugate blanks into trays. The TF200 will pull a piece of flat corrugate into the machine, form it and

then drop it onto a power-incline conveyor. Once the newly formed corrugate tray is packed, the operator will send it to the BEL 270 for sealing. Features and benefits of the TF200 and BEL 270 integration at PACK EXPO include:

- Second HMI to control tray forming from the opposite side to adapt to different and changing plant layouts
- Maintenance-free lubrication improves uptime for greater throughput
- Advanced gluing system option
 - Reduces adhesive consumption by up to 30 percent
 - Reduces the effects of adhesive and fluid degradation such as charring/discoloration and odor
 - Clog-free operation minimizes downtime, maintenance, replacement and inventory costs
- Two-stage outfeed conveyor for tray discharge at suitable height for ergonomic packing
- Toolless, color-coded size changeover in minutes with user-friendly, on-machine pictorial guides
- Corrosion resistant and paint free frame construction

To see how the TF200 and BEL 270 integration can improve your packaging line's automation and output, visit Wexxar Bel in booth C-2824 at PACK EXPO 2019. For more information on the TF200 and BEL 270, visit www.wexxar.com; Wexxar Bel is a ProMach brand.

About Wexxar Bel

At Wexxar Bel, corrugated container packaging applications are limited only by the imagination. Our Wexxar case formers and case sealers have been installed in nearly 40 countries and consistently bring customers the lowest cost of ownership and the highest standards of safety. Wexxar also offers the Bel line of corrugated box sealers, tapers, and packing systems as well as the IPAK line of tray and bliss formers, stackers, and sealers systems. As part of the ProMach End of Line business line, Wexxar helps our packaging customers protect and grow the reputation and trust of their consumers. ProMach is performance, and the proof is in every package. Learn more about Wexxar Bel at www.Wexxar.com.

About ProMach

ProMach is a family of best-in-class packaging solution brands serving manufacturers of all sizes and geographies in the food, beverage, pharmaceutical, personal care, and household and industrial goods industries. ProMach brands operate across the entire packaging spectrum: filling and capping, flexibles, pharma, product handling, labeling and coding, and end of line. ProMach also provides Performance Services, including integrated solutions, design/build, engineering services, and productivity software to optimize packaging line design and deliver maximum uptime.

ProMach designs, manufactures, integrates, and supports the most sophisticated and advanced packaging solutions in the global marketplace. Its diverse customer base, from Fortune 500 companies to smaller, privately held businesses worldwide, depends on reliable, flexible, technologically advanced equipment and integrated solutions. ProMach is headquartered near Cincinnati, Ohio, with manufacturing facilities and offices throughout the United States, Canada, Mexico, Brazil, Europe, United Arab Emirates, and China. For more information about ProMach, visit www.ProMachBuilt.com.
